Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-13 (cancelled)

14. (new) A method of providing an integrated album of stored images in a digital camera, comprising:

- a) using an image sensor in the digital camera to capture digital images;
- b) storing the captured digital images in a digital memory of the digital camera;
- c) providing user controls on the digital camera to enable a user to designate one or more of the captured digital images as captured album images ;
- d) storing the captured album images in an album storage section of the digital memory of the digital camera;
- e) receiving transferred album images from a host computer and storing the transferred album images in the album storage section of the digital memory of the digital camera; and
- f) in response to the user controls, displaying the album images, including both the captured album images and the transferred album images, on a display screen of the digital camera.

15. (new) The method of claim 14, wherein the user controls further enable the user to scroll up and down to change which album image is displayed.

16. (new) The method of claim 14, wherein the user controls further enable the user to select a slide show feature which provides an automatic scrolling of the album images after a particular time period.

17. (new) The method of claim 16, wherein the user controls further enable the user to modify the particular time period.

18. (new) The method of claim 14, wherein the album storage section is subdivided into different album storage sub-sections.

19. (new) The method of claim 14 wherein the user controls further enable the user to delete album images.

20. (new) The method of claim 19, wherein password protection is utilized when deleting album images.

21. (new) A method of providing an integrated album of stored images in a digital camera, comprising:

- a) providing a first memory which stores captured digital images;
- b) providing a second memory which stores album images;
- c) providing user controls on a digital camera to enable a user to designate one or more of the captured digital images as captured album images;
- d) storing the captured album images in the second memory;
- e) receiving transferred album images from a host computer and storing the transferred album images in the second memory; and
- f) in response to the user controls, displaying both the captured album images and the transferred album images, on a display screen of the digital camera.
